

ILYA SERVERS

ENTERPRISE INFRASTRUCTURE & AI COMPUTE

Compute power, backed by expertise.

An Iran-based importer, server integrator and technical service provider focused on HPE ProLiant Gen9-Gen12, enterprise components, GPUs and LLM-ready systems.

COMPANY PROFILE

Tehran, Iran

ilyaservers.ir

info@ilyaservers.ir

01 / COMPANY

Focused expertise in enterprise compute

Ilya Servers sources, configures and supports enterprise server platforms and components for organizations, AI teams, resellers and qualified supply partners in Iran.

CORE PLATFORM

HPE ProLiant

Technical focus across Gen9 through Gen12, covering replacement, upgrade and new deployment requirements.

COMPONENTS

Memory & Storage

Enterprise RAM, HDD and SSD supply with part-number, generation, interface and condition clarity.

GROWTH AREA

GPU & LLM Systems

Workload-based system design for inference, fine-tuning, training and private AI deployments.

LIFECYCLE

Technical Services

Configuration, assembly, diagnostics, repair, maintenance, testing and planned upgrades.

LEGAL / TRADING NAME

Ilya Servers

No. 120, Khorramshahr St., North Sohrevardi Ave., Tehran, Iran

WhatsApp / Mobile: +98 910 480 3040 | Office: +98 21 8874 2908

02 / CAPABILITIES

From one part number to a complete system

Every request is evaluated through compatibility, workload, condition, availability and lifecycle support.

01 HPE ProLiant Gen9-Gen12

- Server sourcing and replacement
- Upgrade paths and compatibility review
- CPU, memory, controller and storage configuration

02 Enterprise Memory & Storage

- DDR4 and DDR5 server memory
- SAS, SATA and NVMe storage
- New, open-box, refurbished and system-pull clarity

03 GPU & AI Infrastructure

- Professional GPU sourcing
- LLM inference, fine-tuning and training systems
- VRAM, power and thermal planning

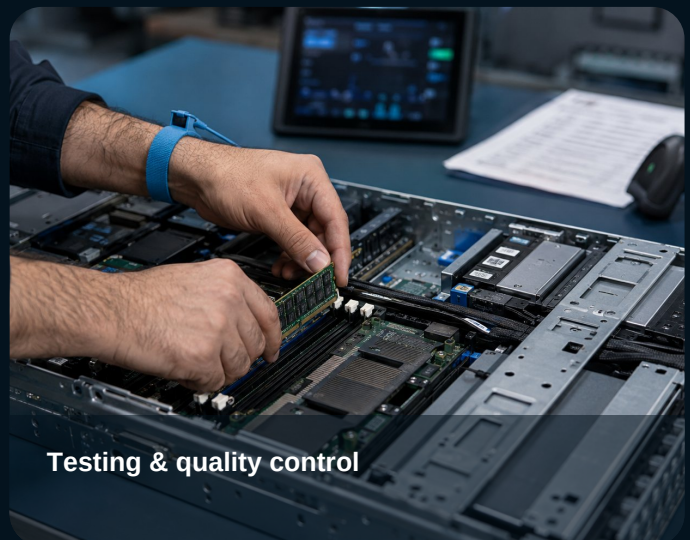

04 Lifecycle Services

- Assembly and agreed testing scope
- Maintenance and capacity upgrades
- Diagnostics, repair and component replacement

03 / OPERATIONS

A disciplined operational workflow

Technical review, organized sourcing, diagnostics and controlled testing.

Operational visuals created for this profile; replace with commissioned company photography when available.

04 / PROCUREMENT

What we source from qualified suppliers

We welcome clear, part-level offers from manufacturers, distributors, stockists and qualified enterprise hardware suppliers.

TARGET CATEGORIES

- HPE ProLiant systems and spare parts
- Enterprise DDR4 and DDR5 memory
- SAS, SATA and NVMe HDD/SSD
- Server CPUs, controllers and power supplies
- Professional GPUs and AI components
- GPU server platforms and upgrade parts

A USEFUL QUOTATION

- Manufacturer and exact part number
- Condition, grading and quantity
- Stock location and lead time
- MOQ and quantity price tiers
- Packing, warranty and return terms
- Currency, validity and applicable Incoterms

COMMERCIAL TRANSPARENCY

Recurring and project-driven procurement

Numeric purchase volumes are not published without verified operating data. Category- and item-specific volume ranges are shared with qualified suppliers against active requirements and commercially relevant offers.

A clear path from introduction to repeat supply

OUR SUPPLIER PRINCIPLES

Accurate specifications | Transparent grading | Competitive pricing

Responsive communication | Reliable packing | Consistent fulfilment

LET'S BUILD A RELIABLE SUPPLY RELATIONSHIP

Send a precise offer. Receive a precise response.

Introduce your company, product categories and current inventory. Include exact part numbers, condition, quantity, stock location, lead time, warranty, MOQ and price tiers.
